

12th ANNUAL ON PROPERTY
RAM SALE

Wednesday 2nd October 2024

- Offering 60 Rams
- Sale commencing at 1.00PM
- Inspection & Registration from 10.00AM
- Morning tea from 10.00AM
- Lunch 12.00 to 1.00PM

**plevna
merinos**

MODERN MERINOS SINCE 1979

'Plevna', Numulla Rd, Trundle NSW

Important Client Information

ANIMAL HEALTH INFORMATION

- Vaccinated December 2023 and 6th May 2024 with 6 in 1
- Drenched 17th May 2024 Triguard 12mls
- Plunge dipped December 2023 Assasin, backlined Extinosad 17 May 2024
- Shorn and fleece samples collected 17th May 2024
- Carcase data collected 14th August 2024 by Trevor Pearce
- Genomics Testing collected 20th July 2024 and processed by Neogen Australasia
- ASBVs calculated by Sheep Genetics 21st August 2024

IMPORTANT

Grade rams are available for purchase by appointment after the sale

| Years | 2005 | 2006 | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 |

plevna merinos

Australian Sheep Breeding Values are an estimate of an animal's true breeding value based on pedigree and performance recorded information. They are essentially a projection of how that animal's progeny will perform for a range of traits.

YCFW (Yearling clean fleece weight)

ASBVs describe the value of animals' genes for wool weight – a positive ASBV means a genetically heavier-cutting animal.

YFD (Yearling Fibre Diameter)

ASBVs describe the value of an animals' genes for finer or coarser wool – a negative ASBV is a genetically finer animal.

YWT (Yearling Weight)

ASBVs describe the animals' genetic merit for growth rate. A positive ASBV means the animal is genetically faster growing.

YFAT (Yearling Fat)

ASBVs describe the value of an animal's genes for fat depth at a constant weight – a negative ASBV means a genetically leaner animal.

YEMD (Yearling Eye Muscle Depth)

ASBVs describe the value of animal's genes for eye muscle depth at a constant weight – a positive ASBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in the higher-priced cuts.

ASBVs - **pink = top 5%**, **blue = top 10%**, **green = top 20%**, **grey = top 50%**

Wool Production (WP) index

The Wool Production (WP) index is based on a production system where the majority of income is from the wool clip with a strong focus on wool production. The production system modelled for the Wool Production index is a self-replacing system producing 16–18 micron wool from the breeding flock and a mixed age wether flock. With a wool to meat income ratio of 71:29 for this production model, the index focuses on genetic improvement of fleece weight, fibre diameter, staple strength, and reproduction, along with emphasis to reduce wrinkle.

Sustainable Merino (SM) index

The Sustainable Merino (SM) index is based on a production system where the income derived is a balance of sheepmeat and wool clip, with a large focus on improving the quantity and quality of the wool remains. Based on a self-replacing Merino flock the production system produces 17–19 micron wool with lambs sold off-shears at a post weaning age. The wool to meat income ratio of the production model is 46:54 and emphasis is included on sustainability traits to reduce wrinkle, dag, and worm egg count. An additional penalty has been placed on increasing mature size in this index.
